## **ATTACHMENT A: SCOPE OF SERVICES**

Pursuant to the terms of this Agreement and on an on-call basis, Contractor agrees to repair, remove, replace or install guardrails and handrails at various locations throughout Lake County. The scope of services shall consist of: the removal and repair of damaged sections of guardrail or handrails, the removal and replacement of guardrail or handrail sections, general maintenance, realignment of panels, posts, offset blocks, anchors and hardware, installation of new or modified guardrails or handrails to bring the existing structures into compliance with current Florida Department of Transportation (FDOT) standards, and installation of new guardrails or handrails as requested by the County. All work shall be in compliance with all contract specifications and the most recent edition of the Florida Department of Transportation Standard Specifications for Road and Bridge Construction.

Damaged guardrail or handrails and all associated accessories and hardware shall be replaced using like materials as approved by the County's Project Manager. Any salvageable materials that meet current specifications within the limits of each work site shall be utilized in that work site at no additional cost. All damaged guardrail materials and debris shall become property of the Contractor. Disposal of the above said items shall be the responsibility of the Contractor and shall be included in the cost associated with the replaced component. The Contractor shall remove from the right-of-way all such debris and materials at the end of each work day. All associated hardware such as, but not limited to, nuts, bolts, washers, etc., shall be included in the unit price for the installation of each component.

A Project Order Form shall be issued by email to the Contractor. The Project Order Form shall include the location, the guardrail identification number, type of damage to include the length and indicating whether or not there is end terminal damage. The Contractor shall have seven (7) calendar days to make a site inspection and return a completed quote. The County shall review the submitted quote, and if in agreement, shall sign and return the quote to the Contractor. No work shall commence without the signed quote except in the case of an emergency and as directed by the County. The Contractor shall have twenty-one (21) calendar days from the receipt of the approved and signed quote to complete the work.

The Contractor shall notify the County's Project Manager in writing by email with a schedule for the work to be completed and again upon the completion of each work request. Upon receipt of the completion notice, the County's Project Manager or other County representative shall inspect the project for acceptance.

### **GENERAL REQUIREMENTS:**

#### **Occupational Safety and Health/Hazardous Materials**

The Contractor shall certify that all material, equipment, etc., to be used in completion of the Services shall be in accordance with all governmental standards, to include, but not be limited to, those issued by the Occupational Safety and Health Administration (OSHA), the National Institute of Occupational Safety Hazards (NIOSH), and the National Fire Protection Association (NFPA) requirements. The Contractor further certifies that if any of the material, equipment, etc., is found to be deficient in any OSHA requirement in effect on the date of delivery, all costs necessary to bring the material, equipment, etc., into compliance with the aforementioned requirement shall be borne by the Contractor.

All standard equipment, work operations, safety equipment, personal protective equipment, and lighting required or mandated by State, Federal, OSHA, or Americans with Disabilities Act (ADA) Regulations must be provided by the Contractor.

The County's Project Manager or other County Representative may periodically monitor the work for safety. Should there be safety and/or health violations, the County's Representative may have the duty to require the Contractor to correct the violation in an expeditious manner. If there is any situation that is deemed unsafe by the County's Project Manager or other County Representative, the project will be shut down immediately upon notice and no work shall resume until the unsafe condition has been remedied.

The Contractor shall be aware that while working for the County representatives from agencies such as the United States Department of Labor, OSHA, and the Division of Safety, State of Florida, are invitees and do not need permission to enter the work site.

At a minimum, all equipment used within the right of way shall be equipped with a properly operating amber flashing or white strobe light. All safety devices installed by the manufacturer shall be in place and in proper working order. If the County's Project Manager determines that equipment is deficient in safety devices, the Contractor shall be notified immediately. The Contractor shall immediately repair, or remove the equipment from service until the deficiency is corrected to the satisfaction of the County's Project Manager. Inspection and approval of the Contractor's equipment by the County's Project Manager shall not relieve the Contractor of responsibility or liability for injury to persons or damage to property caused by the operation of the Contractor's equipment, nor shall it relieve the Contractor of the responsibility to meet the established time for completion of the service.

The Contractor shall designate a competent person of its organization whose duty shall be the prevention of accidents at the site. This person shall be literate and able to communicate fully in the English language because of the necessity to read job instructions and signs, as well as the need for conversing with management personnel. This person shall be the Contractor's Superintendent unless otherwise designated in writing to the County's Project Manager. All communications to the Superintendent shall be as binding as if given to the Contractor.

#### **General Inspection Requirements**

If during or prior to operations, the County's Project Manager should fail to reject defective work or materials, whether from lack of discovery of such defect or for any other reason, such initial failure to reject shall in no way prevent the County's Project Manager's later rejection when such defect is discovered, nor obligate the County to final acceptance or payment, and the Contractor shall make no claim for losses suffered due to any necessary removals or repairs of such defects.

If during or prior to operations, the County's Project Manager rejects any portion of the work on the grounds that the work or materials are defective, the County's Project Manager will give the Contractor written notice of the defect. The Contractor shall then have seven (7) calendar days from the date the notice is received to correct the defective condition. If the defect has not been corrected within seven (7) calendar days, the County's Project Manager will send a second written notice to the Contractor giving the Contractor another seven (7) calendar days to correct the defect. If the Contractor fails to correct the deficiency within the second seven (7) calendar days after receipt of the notice, the County's Project Manager will notify the County so that the County may take whatever action is necessary, including correcting the deficient work utilizing another contractor or terminating the contract.

Should the Contractor fail or refuse to remove and renew any defective material used or work performed, or to make any necessary corrections in an acceptable manner and in accordance with the requirements of the specifications, within the time indicated in writing, the County, will have the authority to cause the unacceptable or defective materials or work to be repaired, removed and replaced, as may be necessary, at the Contractor's expense. Any expense incurred by the County, whether direct, indirect or consequential,

in making the repairs, removals or replacements, which the Contractor has failed or refused to make, shall be paid for out of any monies due or which may become due the Contractor, or may be charged against the contract bond, if any. A Change Order will be issued, incorporating the necessary revisions to the contract documents, including an appropriate decrease to the contract amount. Such direct, indirect and consequential costs shall include, but not be limited to, costs of repair and replacement of work of others destroyed or damaged by correction, removal or replacement of work of the Contractor's defective work and additional compensation due the County. The Contractor shall not be allowed an extension of the contract time because of any delay in performance of the work attributable to the exercise by the County of the County's rights and remedies hereunder.

All work performed and all materials furnished shall be in reasonably close conformity with the lines, grades, cross sections, dimensions, and material requirements, including tolerances, shown on the plans or indicated in the specifications. All material, workmanship, and equipment shall be subject to the inspection and approval of the County's Project Manager. In the event the County's Project Manager finds the materials or the finished product in which the materials are used not within reasonably close conformity to the specifications, the County's Project Manager will then make a determination if the work shall be accepted and remain in place. In this event, the County's Project Manager will document the basis of acceptance by a Change Order which will provide for an appropriate deduction as needed in the contract price for such work or materials as the County's Project Manager deems necessary to conform to the determination based on the County Project Manager's professional judgment.

#### **Project Manager**

It is agreed to by the parties that the County's Project Manager will decide all questions, difficulties, or disputes, of whatever nature, which may arise relative to the interpretation of the plans, construction, prosecution and fulfillment of the scope of services and as to the character, quality, amount and value of any work done, and materials furnished, under or by reason of this contract.

The County's Project Manager may appoint such assistants and representatives as desired. They will be authorized to inspect all work done and all materials furnished. This right of inspection in no way means or implies County control or other supervision over the work done or the work site. This right is solely for the County's benefit and imposes no duties or responsibilities on the County and confers no right on any other parties. Such assistants will not be authorized to revoke, alter or waive any requirement of the contract documents.

The County's Project Manager will be authorized to call to the attention of the Contractor any failure of the work or materials to conform to the contract documents, and will have the authority to reject materials until any questions at issue can be referred to and decided by the County's Project Manager. The County's Project Manager shall have the authority to suspend the work only if the County approves such suspension, if the County's Project Manager is someone other than the County. The Contractor shall be immediately notified in writing by the County of any suspension of the work and such notice shall state in detail the reasons for the suspension. The presence of the County's Project Manager or designee will in no way lessen the responsibility of the Contractor.

The County's Project Manager shall have the authority to order minor changes in the work not involving an adjustment to the contract amount or an extension to the contract time and not inconsistent with the intent of the contract documents. Such changes may be effected by construction directive and shall be binding on the Contractor.

The County's Project Manager shall have all other duties and responsibilities as set forth in other sections of this contract.

**Hours of Operation**

All work performed shall be accomplished between the hours of 7:00 A.M. and 6:00 P.M., Monday through Friday, and no work shall be performed on Saturdays, Sundays, or County Holidays, unless permission to work has been requested in writing by the Contractor and approval, in writing, has been granted by the County's Project Manager. Request for permission to work must be received by the County's Project Manager no less than forty-eight (48) hours prior to the requested work day. Work on Saturdays may be permitted by verbal approval from the County's Project Manager. County Holidays are as follows:

New Year's Day  
Martin Luther King, Jr. Day  
President's Day  
Memorial Day  
Independence Day  
Labor Day  
Veteran's Day  
Thanksgiving Day  
Day after Thanksgiving  
Christmas Day

Special schedules may be established if necessary because of problems with noise or similar problems affecting citizens in homes or buildings adjacent to the roadways. Under no circumstances will permission be given for work, with the exception of emergency situations, on New Year's Day, Independence Day, Thanksgiving Day, or Christmas Day. The County's Project Manager may consider approval in accordance with the provisions stated above, for work on the following days: Martin Luther King, Jr. Day, President's Day, Memorial Day, Labor Day, Veteran's Day, or the day after Thanksgiving.

When the Contractor requests and is approved for Saturday, Sunday or Holiday work, the County may assess the Contractor the sum of Two Hundred Fifty Dollars (\$250.00) per man per day for each Sunday or recognized Holiday worked or planned to work. These fees will be deducted from the final invoice.

**Lands for Work and Access Thereto**

The County shall furnish and define the limits of land for access to the project site. All information shown in the contract documents constitutes the extent of land provided by the County. No storage of equipment or service shall take place on private property. If any storage or service is anticipated to take place on adjoining private property, the Contractor shall contact the owner of the property to complete and sign the "Right of Entry Statement". The original of this completed form shall be provided to the County's Project Manager.

The Contractor shall supply the County's Project Manager any such form before the equipment is placed on private property. Any and all other lands required by the Contractor shall be procured by the Contractor at the Contractor's expense.

As the work progresses, the Contractor shall keep the site reasonably clear of rubbish, trash, waste and other disposable materials on a daily basis. If the Contractor allows the site to become littered and unsightly, any payments otherwise due may be withheld until the Contractor cleans up the site to the satisfaction of the County. All costs associated with clean-up and debris removal must be included with the unit price. If the

Contractor fails to clean up the site, the Count may choose to clean up the site at the Contractor's expense and deduct the associated costs from the amount due the Contractor.

The Contractor shall, absent written permission from a private property owner, confine all equipment, the storage of materials and equipment and the operations of workers to the project site and land and areas identified in and permitted by the contract documents, and shall not unreasonably encumber the projects determined by the County's Project Manager or the County, with equipment or materials. The Contractor shall assume full responsibility for any damage to any such land or area, or to the owner or occupant thereof, or any land or areas contiguous thereto, resulting from the performance of the work. At the completion of the work, the Contractor shall remove all debris, rubbish and waste materials from and about the project site, as well as all tools, appliances, equipment and machinery and surface materials and shall leave the project site clean and ready for occupancy by the County.

#### **Maintenance of Traffic (MOT)**

Maintenance of Traffic shall be required for all work being completed within the limits of the County's right of way. Maintenance of traffic shall be the responsibility of the Contractor, be part of the Contractor's bid price, and shall conform to FDOT's most current edition of "Roadway and Traffic Design Standards" for Design, Construction, and Maintained Systems, FDOT's most current edition of the "Standard Specifications for Road and Bridge Construction" and the most current Federal Highway Administration (FHWA) "Manual on Uniform Traffic Control Devices (MUTCD) for Streets and Highways". These documents can be ordered from FDOT, Maps and Publications Department, 605 Suwannee Street, Tallahassee, Florida 32399-0450, or by going to the FDOT website at: [www.dot.state.fl.us/mapsandpublications](http://www.dot.state.fl.us/mapsandpublications)

All costs associated with MOT must be included in the Contractor's bid price. No separate line items for MOT will be included in the cost estimate. If the Contractor does not comply with the FHWA and MUTCD (i.e. signs, qualified flaggers, and/or barricades), the County reserves the right to direct the Contractor to cease operation until such deficiencies are corrected. In addition, no road closures shall be allowed except in the case of emergencies.

1. All lane closures shall have the prior approval of the County's Project Manager.
2. The foregoing requirements are to be considered as minimum and the Contractor's compliance shall in no way relieve the Contractor of final responsibility for providing adequate traffic control devices for the protection of the public and Contractor's employees throughout the work area.
3. The use of public roads and streets by the Contractor shall provide a minimal inconvenience to the public and traffic.

#### **Underground Utilities**

Any required digging or subsurface work shall be done in accordance with Chapter 556, Florida Statutes. It shall be the responsibility of the Contractor to have all underground utilities located before any work shall begin. This can be done by contacting Sunshine State One Call. They may be reached by calling 1-800-432-4770. The repairs of any damaged underground utilities as a result of the work being performed by the Contractor shall be the responsibility of the Contractor. The proper utility company shall be contacted immediately if damage has occurred to expedite the repairs. The County shall also be notified by telephone at the earliest opportunity and shall be provided a written explanation of the incident within two (2) days.

### **Claims and Disputes**

Claims by the Contractor shall be made in writing to the Project Manager within two (2) business days after the commencement of the event giving rise to such claim or else the Contractor shall be deemed to have waived the claim. Written supporting data shall be submitted to the Project Manager within ten (10) calendar days after the occurrence of the event, unless the County grants additional time in writing, or else the Contractor shall be deemed to have waived the claim. All claims shall be priced in accordance with the original terms of the contract.

The Contractor shall proceed diligently with its performance as directed by the County, regardless of any pending claim, action, suit, or administrative proceeding, unless otherwise agreed to by the County in writing. The County shall continue to make payments on the undisputed portion of the contract in accordance with the contract documents during the pendency of any claim.

A. Claims by the Contractor shall be resolved in the following manner:

Upon receiving the claim and supporting data, the County's Project Manager will review the claim, or if the Project Manager is not a County employee, will forward the claim to the County. The County will within fifteen (15) business days respond to the claim in writing stating that the claim is either approved or denied. If denied, the County will specify the grounds for denial. The Contractor shall then have fifteen (15) calendar days in which to provide additional supporting documentation, or to notify the County that the original claim stands as is.

If the claim is not resolved, the County may, at its option, choose to submit the matter to mediation. A mediator shall be mutually selected by the parties and each party shall pay one-half (1/2) the expense of mediation. If the County declines to mediate the dispute, the Contractor may bring an action in the County or Circuit Court sitting in Lake County, Florida.

B. Claims by the County against the Contractor shall be made in writing to the Contractor as soon as the event leading to the claim is discovered by the County. Written supporting data shall be submitted to the Contractor. The party to whom the Project Manager's determination is not in favor of may appeal the determination as set forth in subsection (A) above.

C. Arbitration shall not be considered as a means of dispute resolution.

### **Damage**

All items damaged as a result of Contractor or subcontractor operations, such as but not limited to, sidewalks, seating, curbs, pipes, drains, water mains, pavement, mail boxes, turf, County signs or other property owned by the County, etc., shall be either repaired or replaced by the Contractor, at its expense, in a manner prescribed by and at the sole satisfaction of the County's Project Manager. Any claims submitted to the County such as, but not limited to, from utility companies or landowners, which are determined to be the result of damage done by the Contractor, shall be the responsibility of the Contractor. County reserves the right to pay any such claims and deduct such amount from the Contractor's invoice. Repairs, or receipt of repairs, will be completed and submitted to the County prior to submission of the Contractor's invoice for work accomplished. If the repair is not in accordance with County standards, the County shall repair the items and deduct the associated cost from the amount due the Contractor. Complaints shall be addressed within forty-eight (48) hours and a written report submitted to the County's Project Manager outlining actions taken to correct the complaint. The Contractor shall notify the County immediately of any complaints given directly to the Contractor.

If in the course of completing work as part of the contract there is an accident that involves the public, the Contractor shall as soon as possible inform the County's Project Manager of the incident by telephone. The Contractor shall follow up in writing within two (2) days of the incident. If Law Enforcement was involved and has written a report, the Contractor shall forward a copy of the report to the Project Manager.

**Protection of Existing Structures, Utilities, Work and Vegetation**

Any damage to existing structures or work of any kind, or the interruption of a utility service resulting from failure to comply with the requirements of the contract documents, shall be repaired or restored promptly by, and at the expense of the Contractor.

The Contractor shall preserve and protect all existing vegetation such as trees, shrubs, and grass on or adjacent to the site which do not unreasonably interfere with the progress of the Contractor as may be determined by the County's Project Manager. The Contractor shall be responsible for all unauthorized cutting or damaging of trees and shrubs, including damage due to careless operation of equipment, stockpiling of materials or tracking of grass areas by equipment.

The Contractor shall fully protect the work from loss or damage and shall bear the cost of any such loss or damage until final payment has been made. If the Contractor or any one for whom the Contractor is legally liable is responsible for any loss or damage to the work, or other work or materials of the County or County's separate contractors, the Contractor shall be charged with the same, and any monies necessary to replace such loss or damage shall be deducted from any amounts due the Contractor.

The Contractor shall be responsible for processing any and all claims for property damage and or bodily injury caused by the Contractor including but not limited to, motor vehicles or pedestrians. The Contractor shall be responsible for the payment of all property damage and bodily injury claims and agrees to save and hold harmless the County from all such claims. Claims not handled by the Contractor or their representative in the proper manner, will be settled by the County. The County shall recover all costs from the Contractor.

**Final Inspection**

Upon written notice from the Contractor that the work has been completed, the County's Project Manager or other designated representative will make a final inspection. The County's Project Manager will notify the Contractor if necessary of any deficiencies, if any, with the project. The Contractor shall correct all deficiencies before final acceptance and payment is made.

The Contractor shall notify the County's Project Manager when the deficiencies have been completed and corrected. If the deficiencies are not corrected when inspected, the Contractor shall be notified again in writing about any deficiencies. Once the repairs have been corrected by the Contractor, the County's Project Manager shall make another inspection. There shall be an eighty dollar (\$80.00) inspection fee assessed to the Contractor for this inspection and any re-inspection that may be required after that. The fee is assessed to offset the additional costs associated with County labor and vehicle usage required for unnecessary inspections. The fee(s) shall be deducted from the final invoice for that release order.

**Final Acceptance**

The work order by the approved quote will be considered complete when all work has been completed and has been accepted by the County and the County's Project Manager. The Contractor will then be released from further obligation except as set forth in the warranty in this contract.

The County reserves the right, should an error be discovered in the partial or final estimates, or should proof of defective work or materials used by or on the part of the Contractor be discovered after the final payment

has been made, to claim and recover from the Contractor or its surety, or both, by process of law, such sums as may be sufficient to correct the error or make good the defects in the work and materials, including any fees or costs associated with the additional services of the County's Project Manager.

#### **Warranty**

The Contractor hereby acknowledges and agrees that all materials, except where recycled content is specifically requested, supplied by the Contractor in conjunction with this solicitation and resultant contract shall be new, warranted for their merchantability, and fit for a particular purpose. In the event any of the materials supplied to the County by the Contractor are found to defective or do not conform to specifications: (1) the materials may be returned to the Contractor at the Contractor's expense and the contract cancelled or (2) the County may require the Contractor to replace the materials at the Contractor's expense.

#### **TECHNICAL REQUIREMENTS:**

**GUARDRAILS:** When requested the Contractor shall repair or install new guardrail components that meet or exceed the following specifications.

#### **Posts:**

Use posts of either timber or steel and of the sizes and dimensions shown in the plans or that of the existing conditions. Use the particular type selected throughout a run of rail, except where special steel posts are required.

- a. Timber Posts: Meet requirements of the latest edition of the Southern Pine Inspection Bureau's Standard Grading Rules for Southern Pine Lumber, for No. 1 grade timber, and treat the posts in accordance with the requirements for post in 955-5.3. Ensure that penetration of preservative is in accordance with requirements for round piles and fence posts in 955-6.2. Shape and drill the posts prior to treatment and ensure that they do not vary more than one (1") inch [+/- 25mm] from the specified length. Dress all timber posts on all four sides (S4S).
- b. Steel Posts: Use steel posts meeting the requirements of ASTM A36 [ASTM A36M] steel. Galvanize the posts in accordance with the requirements of ASTM A 123 [ASTM A 123M], with 2oz/ft<sup>2</sup> [600 g/m<sup>2</sup>] of zinc coating. Drill the posts prior to galvanizing. Ensure that the manufacturer furnishes certification showing physical and chemical properties of each heat, the amount of spelter coating, and conformance ASTM A 123 [ASTM A 123M]. The Contractor may use steel guardrail posts of either a rolled section or a welded structural shape with nominal dimensions as shown in the Design Standards. For welded structural shapes, it must meet the following requirement:
  - i. Ensure that the design properties of the shape meet or exceed the design properties for a W 6 x 9 [W 150 x 14] shape as contained in the AISC Manual of Steel Construction.
  - ii. Weld in accordance with the requirements of ASTM A 769 [ASTMA 769M].
  - iii. After cutting posts to length, place a weld to seal the spaces between the web plate and flange plates.
  - iv. Galvanize as specified above after completing all drilling and welding.

- c. **Special Guardrail Posts:** The designation "Special Guardrail Posts" will include only such posts that require special fabrication, for installation at locations where the normal setting would conflict with concrete structures, such as approach slabs, culvert slabs, footings, inlets, etc. Special posts, however, will not include posts for double-face median guardrail, regardless of whether they are embedded in or attached to concrete.
- d. **Setting Posts:** Set standard length posts vertically to the depth shown in the Design Standards. Set special length posts vertically to the depth shown in the plans. Align and realign posts as necessary, until final acceptance. Where the posts are not set in concrete or mounted on structures, backfill the post holes and thoroughly tamp material. As an alternate method, the Contractor may use a post-driving machine, meeting the approval of the County's Project Manager and capable of driving the posts without damaging them. For guardrail post replacement, backfill and compact the existing hole prior to setting the new post. If driving timber posts through asphalt pavement, the Contractor may either block out holes for the posts during the paving operation or cut holes through the mat prior to the post installation. Either block-out or cut through an area that is at least 50% larger than the area of the post being driven. After completing installation of the posts and compaction of the backfill material, patch the area around each post with fresh hot bituminous mixture. If driving steel posts, drive the post directly through the asphalt mat. Fill depressions or cracks with fresh, hot bituminous mixture. When rock, concrete or asphalt are thicker than two-inches (2"), remove such material, backfill with suitable material, and thoroughly tamp material as detailed in the Design Standards.

**Anchor Blocks:**

Use anchor blocks of Class I concrete, and construct and place them in accordance with the requirements shown in the plans or as directed by the Project Manager.

**Offset Blocks:**

Use guardrail offset blocks of either timber, steel, recycled plastic or rubber and of the sizes specified in the Design Standards (see FDOT in Section 2.28). Treat timber blocks in accordance with the requirements for posts in 955-5.3. Ensure that penetration of preservative is in accordance with requirements for around piles and fence posts in 955-6.2. For timber offset blocks, meet the requirements of the latest edition of the Southern Pine Inspection Bureau's Standard Grading Rules for Southern Pine Lumber, for No. 1 grade timber. Dress all timber offset blocks on all four sides (S4S). Ensure that timber offset blocks do not vary more than 0.25 inch [6mm] from the specified length.

**Rubber Blocks:**

Use rubber blocks that have a minimum Durometer hardness 50 (ASTM D 2240), show no cracking at the end of an ozone exposure of 100 +/- 10pphm or 15 hours at 100°F [38°C] (ASTM D1149 mounting type A), do not exceed 15 points change in Durometer hardness in oven ageing for 70 hours at 158°F [70°C] (ASTM D 573), and show no cutting or tearing under 6,500 lb [29kN] load applied through a guardrail section. Ensure that the blocks present a neat appearance and have plane surfaces. Provide rubber blocks that are 6 inches [150 mm] wide, 8 inches [200 mm] deep and 14 inches [360 mm] high. Allow dimensional tolerances of +/- 5/8 inch [16mm] in height, +/- 3/8 inch [10 mm] in width, and +/- 3/8 inch [10 mm] in depth. For Recycled Plastic offset blocks, meet the requirements of Section 972.

**Rail Elements for Guardrails:**

The Contractor shall construct or repair guardrail of the standard W-beam or thrie beam type and shall use materials for the rail and rail elements meeting the steel requirements of FDOT Standard Specifications Section 967-1. The Contractor shall install the type of guardrail panel that is existing unless otherwise directed as by the County's Project Manager. The following are different types of rails that may be used within Lake County.

- a. Steel Guardrail: Steel guardrail materials shall meet the requirements of AASHTO M 180, (except as specified below), and for either Class shown. Type 2 zinc coating will be required. As an exception to the requirements of AASHTO M 180, the coating properties, sampling, test methods, inspection and certification related to galvanizing regardless of the method of galvanization of the rail elements shall meet the requirements of ASTM A 123 [ASTM A 123M]. All supports, fastening and other accessories, including bolts, nuts, washers, etc., and including the steel trailing end anchorage rods required to be used with an aluminum guardrail shall be galvanized as specified in ASTM A 153 [ASTM A 153M]. Acceptance of steel guardrail materials shall be based on manufacturer's certified mill analysis of test results meeting the specification limits of the ASTM or AASHTO designation as stated above. Certification of these test values, representing each shipment of guardrail materials, shall be provided to the Project Manager for each project.
- b. Aluminum Guardrail: Except as might be specified otherwise in the plans, aluminum rail and hardware shall meet the requirements specified otherwise in this Article. The aluminum rail element shall consist of a 0.125 inch [3.2mm] aluminum sheet, Alloy Alclad 2024-T3, formed into a deep-beam type rail in accordance with the details shown on the Design Standards. The rail element shall meet the following requirements:
  - i. Minimum ultimate tensile strength – 62,000 psi [430MPa]
  - ii. Minimum longitudinal strength through splice joint – 80,000 lbs [350kN]
  - iii. Minimum thickness of plate – 0.125 inch [3.2mm]
  - iv. A 2 inch [50mm] test specimen shall elongate not less than 15%

**End Anchorage Assemblies:**

When required the Contractor shall replace a damaged or install a new end anchorage assembly with the type and style that was removed unless otherwise directed by the County's Project Manager. When possible the Contractor shall reuse any parts of the existing guardrail system that has not been damaged or otherwise are unusable. This shall include, but not be limited to, extruder heads.
